

# Specialty Cash Trays

Over sized Cash Tray

Flip Top Cash Tray

Many custom cash tray devices are possible, such as flip top trays for frequent use where exterior exposure to drafts and temperature is not desirable.

Another commonly used specialty tray is an oversized tray large enough to pass cartons of cigarettes or large packages of legal documents.

Yet another application is a sliding tray that can be extended while the facility is in operation, then pulled closed and locked at night when the facility is closed.
